ZAMONOV SOBITJON

OBJECTIVE

To apply and expand my knowledge as a Fullstack Developer by contributing to innovative, user-friendly web applications. I aim to grow professionally by working on real-world projects, continuously learning new technologies, and becoming a valuable asset to the development team.

SKILLS

Technical Skills
Programming Languages: JavaScript (ES6+), TypeScript, Python
Backend Frameworks: Express.js, NestJS
Frontend Frameworks: Html5, Css, Scss, Tailwindcss, React+vite
Databases: PostgreSQL, MongoDB, MySQL
Caching & Performance: Redis, WebSockets
DevOps & Tools: Docker, Git, GitHub
Other: RESTful APIs, Telegram Bot Development

LANGUAGES

Uzbek native
English
Russian

EDUCATION

Tashkent University of Information Technologies
Bachelor's Degree in Computer Science (Ongoing)
Tashkent, Uzbekistan
Currently pursuing a Bachelor's degree focused on computer science and software engineering fundamentals.
Gaining strong theoretical and practical understanding of algorithms, databases, and web technologies.

Education Software Center – Najot Ta'lim
Fullstack Web Development Course (Completed)
Tashkent, Uzbekistan
Successfully completed an intensive, project-based program in fullstack web development.
Built real-world applications using HTML, CSS, JavaScript, React.js, Node.js, Express.js, MongoDB, and PostgreSQL.
Emphasized on clean code, version control with Git/GitHub, and deployment of functional web applications.

PROJECTS

Lms system Key Features:

• User authentication and role-based access control (Admin, Instructor, Student)
• Course and lesson management with CRUD functionality
• Responsive user interface built with React.js and Tailwind CSS • Backend API developed with Node.js, Nest.js, and PostgreSql
• JWT-based authentication and secure API routing Used Git and GitHub for version control and collaborative development
• Used Redis as a caching layer to store frequently accessed data (e.g., course lists, user sessions), improving performance and reducing database load

Nasiya Savdo

Deferred Payment – Customers receive the product without making a full upfront payment.
• Installment Payments – Payments are made in parts according to a pre-agreed schedule.
• Interest or Additional Fees – Some installment plans may include interest, while others may be interest-free.
• Contract-Based Agreement – Payment terms are agreed upon in advance and legally binding.
• Involvement of Financial Institutions – In some cases, banks or financial institutions act as intermediaries.

Jira Clone:

Developed a Jira-like project management application that allows users to create and manage projects, tasks, and teams. Implemented authentication, role-based access control, and real-time task updates. Used Next.js with TypeScript for a scalable front-end architecture, Prisma ORM and PostgreSQL for data persistence, and NextAuth for secure user authentication.
